BINZEL Series Air & Water Cooled MIG/MAG Torches

BINZEL SERIES AIR COOLED MIG/MAG TORCHES

(All pricing excludes GST)

Consumable Parts

All wear and spare parts are manufactured to the same specification as the OEM and are fully interchangeable.

Swan Necks

Manufactured to the same specification as the OEM.

Hanger Hook

A "plug and play" option, they encourage the operator to hang the torch off the ground where it is easy to locate.

Medium Ergo Trigger Assembly

Rapid field servicing ensured by a simple "plug and play" system. Switches can be exchanged in 5 seconds without the use of tools.

Ergo Handle

A patented screwless design combines the ultimate in balance, positioning and ergonomics. Torch handles disassemble in 5 seconds for rapid fault analysis. Top and bottom handle soft grips ensure all day welder comfort.

Knuckle Joint and Cable Support

Small movements of the handle and neck are possible independent of the cable assembly. A moulded polymer cable support increases flexibility and electrode support.

Hyperflex Cable Systems

Air cooled cable assemblies offer outstanding flexibility with the highest heat and abrasion resistance of any known cable. The outer jacket is constructed from cross-linked polymers providing a tear proof outer with a burn threshold of 375°C.

Rear Cable Support

Extra length cable support systems ensure smooth and consistent wire feed at any angle.

Spring Pins

Fitted with unbreakable spring loaded gun plug body pins.

Gun Plug Housing

Tough and damage resistant, housings and nuts are formed in robust glass-reinforced polymers encasing all conductive parts in accordance with EN60974-7.

BINZEL SERIES WATER COOLED MIG/MAG TORCHES

(All pricing excludes GST)

Consumable Parts

All wear and spare parts are manufactured to the same specification as the OEM and are fully interchangeable.

Hanger Hook

A "plug and play" option, they encourage the operator to hang the torch off the ground where it is easy to locate.

Medium Ergo Trigger Assembly

Rapid field servicing ensured by a simple "plug and play" system. Switches can be exchanged in 5 seconds without the use of tools.

Knuckle Joint and Cable Support

Small movements of the handle and neck are possible independent of the cable assembly. A moulded polymer cable support increases flexibility and electrode support.

Water In/Out Supports

Fitted as standard to ensure delivery and uninterrupted flow rate of coolants.

Spring Pins

Fitted with unbreakable spring loaded gun plug body pins.

Swan Necks

Manufactured to the same specification as the OEM.

Ergo Handle

Handle weight has been reduced wherever possible, which when combined with the correct ratio of cable support length and stiffness, provides the perfect balance between user comfort and excellent wire feed performance. Top and bottom handle soft grips ensure all day welder comfort.

Hydroflex Cable Systems

Water cooled cable systems use high temperature-resistant rubber cables and are colour coded for ease of identification. Unique cable end geometries ensure leak free terminations.

Rear Cable Support

Extra length cable support systems ensure smooth and consistent wire feed at any angle.

Gun Plug Housing

Tough and damage resistant, housings and nuts are formed in robust glass-reinforced polymers encasing all conductive parts in accordance with EN60974-7.

BINZEL SERIES PUSH/PULL MIG/MAG TORCHES

(All pricing excludes GST)

Consumable Parts

All wear and spare parts are manufactured to the same specification as the OEM and are fully interchangeable.

Swan Necks

Manufactured to the same specification as the OEM.

Handle Grip

Large surface area soft grips help torch positioning and welder comfort.

Flip Top

Rapid access available via a flip to access panel.

Visibility

Quick and easy reference of all moving parts.

Motor Option

Available with 24V and 42V motor options.

Speed Control

Optional potentiometer for wire speed regulation.

Knuckle Joint and Cable Support

Small movements of the handle and neck are possible independent of the cable assembly. A moulded polymer cable support increases flexibility and electrode support.

Cable Systems

Individual power cable, gas hose and industrial grade outer liner are protected by a durable canvas cover.

Pulse Mig Cable Systems

Larger copper cross section power cables are an available option for high end pulse MIG applications.

Rear Cable Support

Extra length cable support systems ensure smooth and consistent wire feed at any angle.

Housings, Nuts and Supports

Tough and damage resistant, housings and nuts are formed in robust glass-reinforced polymers encasing all conductive parts in accordance with EN60974-7, CE and CCC.

TORCH PACKAGE CONFIGURATION

Ordering Information

Torch package part numbering is configured using the simple 5 stage system outlined below:

1. Select the correct model of torch
2. Select the motor voltage required
3. Select the torch neck type
4. Select the potentiometer value if required
5. Select the cable length required.

Example:

UGP360A-24-A45-P1-8M

TWECO Series Air Cooled MIG/MAG Torches

TWECO SERIES AIR COOLED MIG/MAG TORCHES

(All pricing excludes GST)

Consumable Parts

All wear and spare parts are manufactured to the same specification as the OEM and are fully interchangeable.

Hanger Hook

A "plug and play" option, they encourage the operator to hang the torch off the ground where it is easy to locate.

Knuckle Joint and Cable Support

Small movements of the handle and neck are possible independent of the cable assembly. A moulded polymer cable support increases flexibility and electrode support.

Terminations

A comprehensive range of USA and European style terminations ensures worldwide compatibility.

Euro Terminations

Fitted with unbreakable spring loaded gun plug body pins.

Swan Necks

Manufactured to the same specification as the OEM.

Handles and Cable Supports

Designed to combine balance, positioning and ergonomics with practical torch performance, cable life and consistent wire feed.

Air Cooled Cable Systems

Hyperflex air cooled cable assemblies offer outstanding flexibility with the highest heat and abrasion resistance of any known cable. Cable end and crimp systems ensure maximum conductivity whilst the outer jacket is constructed from cross-linked polymers providing a tear proof outer with a burn threshold of 375°C.

Rear Cable Support

Extra length cable support systems ensure smooth and consistent wire feed at any angle.

Housings, Nuts and Supports

Tough and damage resistant, housings and nuts are formed in robust glass-reinforced polymers encasing all conductive parts in accordance with EN60974-7, CE and CCC.

SUPERIOR WELDING PRODUCTS

**SUREGRIP™
Series Ergo
TIG Torches**

SUREGRIP™ SERIES ERGO TIG TORCHES

Torch Bodies

High temperature resistant silicon rubber provides a lightweight and durable cover.

Accessibility issues are made easier from a choice of SF225 and "Multijust™" models that allow for varied front end set ups and multiple head angle configurations.

Options Include: Standard
Flexible
"Multijust™"

Knuckle Joint

Knuckle joints facilitate easy and accurate movements in torch position.

Rear End Terminations

An extensive range of alternate terminations ensures EU/UK compatibility.

Consumable Parts

All wear and spare parts are fully interchangeable with the OEM.

Switches

Rapid field servicing is ensured through a "plug and play" switch and connector system.

An extensive choice of switch options are available.

Switches can be exchanged in under 5 seconds without the use of tools.

Handles

Two sizes of handle are utilised for the range. The ergonomically superior Tig handles feature soft grips (an industry first), knuckle joints and screwless "plug and play" switch interchangeability.

Cable Systems

Optimum cable performance is guaranteed through the use of rubber cable materials.

Switch leads are shielded as standard to ensure minimal tracking and maximum machine protection.

Positioning of the torch is made easier by the combination of knuckle joints and a flexible leather section that covers the first metre of the torch immediately behind the handle.

NICKEL & COPPER ALLOYS

(All pricing excludes GST)

SUPRANEL 625

Basic coated MMA electrode for welding highly corrosion-resistant Cr-Mo-Nickel base alloys, such as 625, 825 and similar alloys. Also suitable for molybdenum alloyed corrosion-resistant steels, e.g. 7%Mo, such as X1NiCrMoCuN25-20-7 and cryogenic toughness nickel steels.

Very resistant to stress corrosion cracking and pitting corrosion. Cryogenic toughness down to -196°C. In sulphur-free atmospheres, non-scaling <1200°C and in sulphurous atmospheres the weld metal can be used for operating temperatures <500°C. Even at higher temperatures there is only limited carbon diffusion in the weld metal thus avoiding crack-prone carbides at the weld interface of dissimilar joints. The coefficient of thermal expansion is between austenitic and ferritic steels, therefore SUPRANEL 625 is also suited for joining ferritic to austenitic steels, dissimilar joints, at operating temperatures or postweld heat treatment >300°C.

CODE:	DESCRIPTION:	TRADE PRICE:

HIGH STRENGTH STEEL

(All pricing excludes GST)

TENAX 118-M

TENAX 118-M is an all-position, low hydrogen MMA electrode for welding high strength steels in the tensile strength range, 760-870 N/mm² e.g. T1, HY80, etc. The shortest possible arc and a low travel speed should be used as a low heat input is recommended. The low hydrogen weld metal minimises the risk of cold cracking. Efficiency 120%.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH11832	Tenax 118-M 3.2mm Electrodes (350mm), 2kg, 55pc/pk	\$64.50
ETCPH11840	Tenax 118-M 4.0mm Electrodes (350mm), 2kg, 40pc/pk	\$67.50

STAINLESS & HEAT RESISTANT STEELS

(All pricing excludes GST)

SUPRANOX 316L

Supranox 316L is a semi-basic MMA electrode suitable for welding austenitic steels Cr-Ni steels or cast steels containing 16 - 20% Cr, 10 - 14% Ni and 2 - 3% Mo, i.e. AISI 316 and 316L, having an extra low carbon content. This electrode can also be used for welding stainless steels of the same type whether stabilised or not for servicing temperatures up to +400°C.

It is particularly suitable for offshore, chemical industry, hydro power plants and general construction application. It offers excellent operability and is particularly suitable for downhand butt and fillet welding applications, the 2.5mm and 3.2mm diameter electrodes can be used for positional welding.

This electrode exhibits a stable spray arc transfer resulting in excellent weld bead shape and appearance with a slight concave profile in horizontal vertical fillet welds. There is very little spatter and in combination with the self-releasing slag, post welding time is maintained to a minimum. Under wet corrosive conditions suitable for operating temperatures up to 400°C, resistant to scaling up to 800°C. Easy arc striking and restriking. Suitable for use with either AC (minimum OCV 50V) or DC positive. Efficiency 100%.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH316L25	Supranox 316L, 2.5mm Electrodes (300mm), 3.5kg, 190pc/pk	\$114.90
ETCPH316L32	Supranox 316L, 3.2mm Electrodes (350mm), 4.3kg, 120pc/pk	\$131.50

DW RSP

Semi-basic MMA electrode depositing austenitic-ferritic weld metal which is highly resistant to cracking. Particularly suitable for the welding of dissimilar steels (i.e. stainless steel to mild steel) where heat treatments are applicable.

For hardfacing DW RSP may be used as a buffer layer. Excellent weldability with a spatter free arc, self-releasing slag combined with a very smooth bead appearance. Efficiency 100%. Packed in Gaspac system.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH-RSP25	DW RSP 2.5mm Electrodes (300mm), 3.6kg and 190pc/ pk	\$237.00
ETCPH-RSP32	DW RSP 3.2mm Electrodes (350mm), 4.3kg and 120pc/pk	\$272.00
ETCPH-RSP40	DW RSP 4.0mm Electrodes (350mm), 4.2kg and 80pc/pk	\$278.00

C-Mn & LOW ALLOY STEELS

(All pricing excludes GST)

FERROMATIC 180

A thick rutile coated high-efficiency MMA electrode with a recovery of ~180% and long run-out length. Used for cost effective filling of thicker weld sections and welding long fillet welds. Easy striking & restriking, low spatter, mostly self-releasing slag. The weld bead is very smooth and clean with well blended toes, without undercut into the base plate.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH2340	Ferromatic 180 4.0mm Electrodes (450mm), 5kg, 51pc/pk	\$54.50
ETCPH2350	Ferromatic 180 5.0mm Electrodes (450mm), 5kg, 33pc/pk	\$53.00

FERROMATIC 160

A thick rutile coated high-efficiency MMA electrode with a recovery of ~160% for welding butt & fillet joints. Used for cost effective filling of thicker weld sections and welding long fillet welds. Easy striking & restriking, low spatter and mostly self-releasing slag. The weld bead is very smooth and clean with well blended toes, without undercut into the base plate. For applications requiring higher levels of sub zero ISO-V toughness, basic coated FEBAMATIC 160S is recommended.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH2425	Ferromatic 160 2.5mm Electrodes (350mm), 4kg, 115pc/pk	\$41.00
ETCPH2432	Ferromatic 160 3.2mm Electrodes (450mm), 5kg, 76pc/pk	\$51.50

ETCPH2450	Ferromatic 160 5.0mm Electrodes (450mm), 6kg, 39pc/pk	\$52.00

FLEXAL 60

Cellulosic coated MMA electrode for welding large-diameter pipe lines in the vertical-down position. Used for root and hot passes as well as filling and capping. When root pass welding, negative polarity is recommended. FLEXAL60 is also used for root passes on higher-strength pipe steels, up to X 80. Note: Power source must be suitable for cellulosic-coated MMA electrodes.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH3132	Flexal 60 3.2mm Electrodes (350mm), 9kg, 355pc/pk	\$102.50
ETCPH3140	Flexal 60 4.0mm Electrodes (350mm), 9kg, 237pc/pk	\$97.00

OVERCORD R92

OVERCORD R92 is a rutile coated rutile MMA electrode for welding in all positions. Excellent fusion and good bead aspect. Used with all types of welding equipment even with low OCV. Efficiency 100%.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH4825	Overcord R92 2.5mm Electrodes (350mm), 4kg, 240pc/pk	\$47.00
ETCPH4832	Overcord R92 3.2mm Electrodes (350mm), 5kg, 170pc/pk	\$43.50

C-Mn & LOW ALLOY STEELS

(All pricing excludes GST)

OVERCORD

Medium-thick rutile-cellulosic coated MMA electrode for structural steelwork, workshop and maintenance applications, welding can be carried out with the same current setting in all positions. Excellent all positional operating characteristics, especially vertically-down and the arc characteristic ensures reliable penetration. Welding in the vertical-down position produces flat, slightly concave weld beads. Good gap bridging and easy striking and restriking. Used on primer painted and slightly rusted parts, as there is a high tolerance to impurities. The strong and stable arc makes OVERCORD suitable for welding galvanised steel components. Used on mains transformers. If a softer arc is required OVERCORD Z is recommended.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH6825	Overcord 2.5mm Electrodes (350mm), 4kg, 275pc/pk	\$59.00
ETCPH6832	Overcord 3.2mm Electrodes (350mm), 4kg, 160pc/pk	\$40.00
ETCPH6840	Overcord 4.0mm Electrodes (350mm), 5kg, 105pc/pk	\$38.00
ETCPH6850	Overcord 5.0mm Electrodes (350mm), 5kg, 70pc/pk	\$42.00

SPEZIAL

SPEZIAL is a basic, double coated multi-purpose MMA electrode. The composition of the double coating confers exceptionally good welding characteristics and a highly stable and directional arc. Very good gap bridging and ideally suited for root passes and positional welding. The glassy slag is easily removed from the finely-rippled weld seams. The excellent welding characteristics and ISO-V toughness to -30°C have made SPEZIAL a renowned and reliable electrode for welding structural steel work, production and assembly jobs in industry and for pipeline construction for decades. Welds are of X-ray quality. Optimum AC weldability requires an OCV>65V.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH3725	Spezial 2.5mm Electrodes (350mm), 4kg, 200pc/pk	\$56.00
ETCPH3732	Spezial 3.2mm Electrodes (350mm), 4kg, 125pc/pk	\$42.50
ETCPH3740	Spezial 4.0mm Electrodes (450mm), 5kg, 80pc/ pak	\$51.50

SUPERCITO

SUPERCITO is a heavy basic coated MMA electrode, designed for highly restrained work with static and dynamic loadings. Used in structural engineering, boilers, tanks and vehicle construction and also bridge building and ship building. Recommended for service temperatures down to -50°C. Good CTOD at -10°C.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH7725	Supercito 2.5mm Electrodes (350mm), 4kg, 185pc/pk	\$36.00

C-Mn & LOW ALLOY STEELS

(All pricing excludes GST)

SUPERCORD

SUPERCORD is a medium-coated rutile MMA electrode with a fast freezing slag. Universal all-positional electrode which is very easy to weld, for all light construction work, including pipework. Suitable for vertical down welding of thin plates. Operates on low open circuit voltage, recommended for tack welding. Good slag detachability and excellent bead appearance. Efficiency 100%.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH2825	Supercord 2.5mm Electrodes (350mm), 4kg, 220pc/pk	\$42.50
ETCPH2832	Supercord 3.2mm Electrodes (350mm), 5kg, 140pc/pk	\$35.50

ETCPH2850	Supercord 5.0mm Electrodes (350mm), 5kg, 70pc/pk	\$36.50

SUPERCORD 45

SUPERCORD 45 is a medium-coated rutile MMA electrode, suitable for all positional welding, except vertically down. The arc is stable even on low open circuit voltage. Applications include tack welding and welding on dirty primed plate. Efficiency 100%.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH4516	Supercord 45 1.6mm Electrodes (250mm), 1.3kg, 220pc/pk	\$25.00
ETCPH4520	Supercord 45 2.0mm Electrodes (300mm), 4kg, 360pc/pk	\$36.00

TENAX 56S

TENAX 56S is a basic coated low hydrogen MMA electrode with a very thin coating to improve joint access when root pass welding. The principal applications are related to the all positional welding of steels to BS 4360-50D or equivalent. Designed for pipe welding in position. The main applications are in the following industries, offshore oil and gas, petrochemical and power engineering. Efficiency 100%.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH56S25	Tenax 56S 2.5mm Electrodes (350mm), 4kg, 215pc/pk	\$69.00

VERTICORD 80

VERTICORD 80 is a basic coated MMA electrode with very low hydrogen content for welding vertically down during pipeline construction. Improved efficiency compared to vertical welding with basic MMA electrodes. Suitable for welding steel type X70 with high ISO-V weld metal toughness at -40°C. Welds are of x-ray quality.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH2732	Verticord 80 3.2mm Electrodes (350mm), 7kg, 200pc/ pk	\$175.00

HARD FACING

(All pricing excludes GST)

SUPRADUR 400 - Hard Facing

SUPRADUR 400 is a thin rutile coated MMA electrode for hardfacing applications, which is very easy to use. Weld metal hardness of ~240 - 290HV10 in the as-welded condition, it can reach 400HV after water-quenching.

Deposit a maximum of 3 layers. Used for surfacing against sliding impact, e.g. slideways, shock, e.g. cams and rolling impact, e.g. rotors. Typical applications are civil works and agricultural equipment such as crane parts, rails, slideways, rope pulleys, track-supporting rollers of crawler-type vehicles, wheel flanges and stud links.

CODE:	DESCRIPTION:	TRADE PRICE:
ETCPH40032	Supradur 400 3.2mm Electrodes (450mm), 6kg, 165pc/pk	\$105.50
ETCPH40040	Supradur 400 4.0mm Electrodes (450mm), 7kg, 120pc/pk	\$86.00
ETCPH40050	Supradur 400 5.0mm Electrodes (450mm), 7kg, 85pc/pk	\$97.50

SUPRADUR 600 - Hard Facing

SUPRADUR 600 is a semi-thick basic coating rutile MMA electrode which is easy to use. Weld metal hardness of ~5500 - 650HV which can be ground. Very good resistance to medium impact. Used for hardfacing carbon steels and low alloy steels.

Preheating to 400°C is always necessary, particularly for large work pieces and deposit a maximum of 3 layers. A tough buffer layer using UNIVERS or SUPRADUR 400 is only required in the case of very sensitive base metal. Applications include civil works and mining equipment, shovel teeth, buckets and crawler shoes.

SUPRADUR V1000 - Hard Facing

SUPRADUR V1000 is a thick rutile coated high-efficiency MMA electrode, 160% recovery, the weld microstructure is a hypereutectic stainless chromium hard alloy. Used for hard facing against abrasion by mineral particles not resistant to impact and shock, the deposit is only machinable by grinding. Smooth, regular weld beads are deposited with only minimum penetration. The hardness cracks which typically appear in this weld metal are not detrimental to resistance against mineral abrasion.

When welding sensitive base materials a buffer layer deposited with SUPERCHROMAX N is required. Typical applications include hard facing subject to mineral abrasion, e.g. by sand, gravel, coal, soil, clay and related minerals used ceramics, cement and concrete building materials and mining.

CEBORA SERIES PLASMA TORCHES

(All pricing excludes GST)

Consumable Parts

All wear parts are manufactured to the same or better specifications than the OEM and are fully interchangeable.

Shield caps

Offered in single and two piece with a variety of stand off attachments.

Electrodes

Aircraft grade Hafnium ensures stable arc initiation and maximum electrode life.

Cutting tips

Premium turned to exacting tolerances.

Swirl rings

All swirl rings are made from vespel to give guaranteed component cooling and maximum performance levels.

Options Include: Standard
Flexible
"Multijust™"

Trigger

A patented "slide to operate" switch system guarantees safety and faultless operation.

Terminations

Terminations are offered in a "direct to machine" or central connector configuration.

Heads

Plasma torch heads are very sophisticated components. High velocity gases, high voltage, extreme temperature and sometimes less than desirable air quality must all be precisely controlled.

Strata utilize the highest quality raw materials and processing techniques to produce high performance, maximum endurance torch heads.

Torches carry a 1 year warranty.

Safety System

Twin pin safety ensures the torch cannot be activated if the shield cap is not in place.

Handles

Two sizes of handle are utilized for the range and feature soft grips. The handle designs contain all the working and moving parts.

Poke Yoke assembly techniques have ensured simplified "plug & play" component assembly for easier maintenance.

Cable Supports

Cable supports are engineered to provide the correct combination of cable protection and ergonomic balance.

Cable systems

Coax cable and separate style options are housed in neoprene or a high endurance neoprene / canvas cover.
