INVERTER TIG WELDER

The EZITIG 205AC/DC is a powerful highly portable, easy to use machine. Extreme stress tested to 440V with IP23 protection, the EZITIG 205AC/DC is built to last in the harshest NZ work environments.

- IGBT inverter technology for smooth & stable welding output and increased reliability
- Industrial IP23 casing with front panel protection resists damage, moisture and corrosion
- Microprocessor control system for superior and dynamic arc characteristics
- Lightweight & compact design, ideal for portable applications
- Extreme stress tested in production up to 440V, ensuring rugged reliability
- Great control and easy to use MMA welding with adjustable arc force, hot start and auto anti-stick control
- Lift TIG and HF start modes gives versatility when welding around sensitive electronic equipment
- Electronic HF TIG arc ignition system, contamination free and easy arc starting with low EMF interference
- Spot welding function with 2T/4T trigger control
- Durable and reliable with high quality & over specified electronic components
- Intelligent protection system with temperature, voltage and current sensors for increased reliability and safety
- Designed to work with generator power supply with protection from power surges.
- Multi PCB construction is economical to service and repair compared to single PCB design
- Potentiometer torch/ foot pedal remote control with finger tip remote control
- All remote functions connect through single plug 12 pin connection
- Quick connect inlet gas fitting
- Accessories include 3m earth lead with heavy duty earth clamp, 4m MMA lead with heavy duty twist lock electrode holder, Strata Professional PRO26 12ft TIG torch with composite machine connection, 2 stage flowmeter, argon gas regulator, 4m gas hose, gas inlet quick connector and hose clamps.
